

Gel-based protein analytics & western blots

Your competent life science partner

- 1 Sample labeling**
- patented SPL-kits for reliable qWB analytics
 - labeling kits (minimal & saturation)
 - fluorescent secondary antibodies

- 2 Protein separation and transfer**
- high-resolution horizontal ORCA Electrophoresis Unit incl. precast gels (SDS, IEF)
 - dry blotter for blotting in HD-quality

- 3 Detection and evaluation**
- ECL/Fluorescence OctoPlus Imager
 - homogeneous illumination and imaging of the large surfaces
 - modularly expandable
 - simple, workflow-guided software incl. expert-mode

- 4 Hands-on Workshop**
- Quantitative Western Blot methods in theory and practice incl. troubleshooting
 - What happens to my sample?
 - How do I normalize my target?
 - How can I compare the blots?
