

Tailored proteomics services

Publication-ready data within a few weeks

1 Experimental design

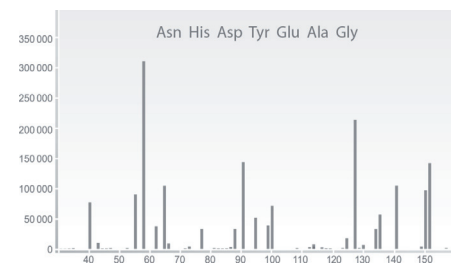

Consulting and support for:

- Experiment planning
- Sample harvesting
- Sample preparation

2 Tailored analytics

- Rich portfolio of MS-services
- Multiplex-2D gel analytics combined with MS

3 Data processing

- Data curation and transfer
- Support during data analysis

NHD Protein Services

State-of-the-art expertise for science and industry

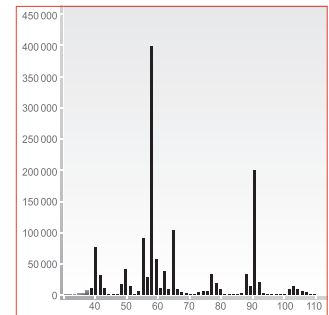

-
- Expert scientific support**
- Experiment conceptualization
 - Sample preparation
 - Data analysis

-
- Areas of research**
- Protein purity
 - Proteome profiling
 - Biomarker discovery
 - Post-translational modifications

-
- Methods we employ**
- LC-MS/MS
 - MALDI imaging
 - 2D DIGE proteomics
 - SRM, PRM and MRM
 - Label-free quantification
 - Quantification with labeling

-
- State-of-the-art equipment**
- M-class nano-UPLC system (Waters)
 - ESI-Ion-Trap MS (Esquire HCT, Bruker Daltonics)
 - Nano-LC/Capillary LC system 1000 series (Agilent)
 - ESI-/MALDI-IMS-QqTOF-MS Synapt G2Si (Waters)
 - LTQ-Orbitrap-XL with ETD-function (Thermo Scientific)
